

Maleic Anhydride

Maleic Anhydride is used in motor oil additives, artificial sweeteners, flavor enhancers, paper sizing, detergents, water treatment chemicals, hair sprays, pharmaceuticals, agricultural chemicals and unsaturated polyester resins.

Formula: $C_4H_2O_3$
Molecular Weight: **98.06**
CAS Registry Number: **108-31-6**

Typical Properties

Specifications

Appearance	White pastilles
Maleic Anhydride % \geq	99.5
Fe, PPM \leq	5
Ash, PPM \leq	20
Crystallizing Point, $^{\circ}C \geq$	52.4
Melting Color, APHA \leq	20

Forms/Packaging

White pastilles, 25 kg sack.
