

# POLYMERIZED GUM ROSIN

## GR402

**Polymerized Gum Rosin (GR402)** is a modified products of gum rosin, contains abietic type acids. It has a series of excellent properties such as higher softening point (125-135°C), more resistant to oxidation and crystallization and high viscosity in organic solvent.

---

### Typical Properties

### Specifications

---

|                                   |         |
|-----------------------------------|---------|
| Acid Value (mg KOH/g), Min.       | 140     |
| Softening Point (Ring & Ball), °C | 125-135 |
| Color, Gardner, Max.              | 10      |

---

### Suggested Applications

Mainly used in inks, Adhesives, paints, Varnishes, Soldering fluxes, synthetic resin etc.

### Forms/Packaging

In galvanized iron drum, 220 kg net each drum.

### Method of Analysis

ZBB72009-89

### Country of Origin

People's Republic of China.
